Prisma Traditional

Release Notes for 2021.112 (23rd June)

New Features

Automatically Export to Ignitia when each time a booking confirmation is SCC approved

Given the agency is already configured to use the order approval workflow, now the agency administrator can enable automatic financial updates when a booking confirmation is SCC approved. This will make sure there is no order discrepancies between Prisma Traditional and Ignitia to avoid any unknown financial liabilities.

- Export to Ignitia is automatically triggered once the booking confirmation is approved by the approver.
- If the auto export fails, the system will automatically send the updates every 30 minutes, provided the order confirmation remains approved.
- The buyer can continue to export to Ignitia manually, provided the order confirmation is approved.

Improvement of user experience by introducing sorting and searching capabilities

Sorting (by PINYIN) and search capabilities are now available in the following fields.
